

Data Collection

Date	26 August 2022
Team ID	PNT2022TMID21516
Project Name	AI-powered Nutrition Analyzer for Fitness Enthusiasts

Collect images of different food items organized into subdirectories based on their respective names as shown in the project structure.

Create folders of types of food items that need to be recognized.

In this project, we have collected images of 5 types of food items: apples, 'banana', 'orange', 'pineapple' and 'watermelon', they are saved in the respective subdirectories with their respective names.

For more accurate results we can collect images of high resolution and feed the model with more images.

You can download the dataset used in this project using the link below.
